MY PARTNERS TRUSTED IN MY EXPERTISE

Mr. Goyal

My idea to start a solar module production line was there for more than 2 years. I had 2 partners that also thought about it. After we all made the decision to start with the business plan an I went through all the chapters, I was able to answer all the questions of my partners based on facts. Finally we started a small line with 5 MW where we make special panels for private house owners.
