Our Premium E-Course:

3 Weeks to a Perfect PV Panel Production Business Plan

In our E-course we guide you through the whole process of creating a business plan, including all the financial calculations.

- ➔ **Personal WhatsApp support:** throughout the course, we (Mr. Patrick Thoma and Mr. Johann von Gott Thoma) will be available personally to answer your questions.
- ➔ **Save time and costs:** our course is much cheaper than a professional due diligence company and much faster than doing everything on your own!
- ➔ **Get access to our knowledge:** benefit from our 20 years of experience in the PV business and become a real expert on your own.
- ➔ **Learn from real experts:** we have been producing solar modules for more than 10 years with our own production line in Europe.

80% of our data comes from us and 20% has to come from you. **We provide video, WhatsApp, and email support.** We give you real data from a currently running production, not estimates!

Yes, I want more details about the business plan!
