What Our Customers Say

HUGE KNOWLEDGE

Prof. Dr. Karabanov

Hans knows nearly everything in this business. We discussed not only about normal solar but also about research, new technologies in the market and the future of the solar business. It was nice to discuss in Germany!

FINALLY IT WAS A VERY GOOD DECISION

Mr. Ramadani

At the beginning I was not sure if it is possible to make a finance plan only with an e-course, but with the personal assistance it was very easy and I got a great result. Thanks to Patrick for the discussions and help.

Build your own highly profitable PV production line with innovative tailor-made services and industry-leading technology
